DR. NADIA SAKATI

Senior Consultant Pediatrician
King Faisal Specialist Hospital and Research Center

A pioneer in her field who is internationally recognized for her discoveries and research in genetic disorders. Dr. Sakati has described three rare disorders in children in her co-authored books, Sakati–Nyhan–Tisdale syndrome with William Leo Nyhan and W.K. Tisdale, Sanjad-Sakati syndrome with Sami A. Sanjad, and Woodhouse-Sakati syndrome, with N. J. Woodhouse.

During her 40 years of service at KFSH&RC, Dr. Sakati has held several noteworthy positions, including Chairman of the Pediatrics department, Director of Genetics/Endocrinology and Metabolic Disease Fellowship Program, and Head of the Medical Genetics Section. She now serves as a Distinguished Senior Consultant in her department.

Dr. Sakati has also delivered several international lectures at the National Institute of Health, USA; Yale University, USA; and Arab and American Meeting, Syria. She is also a member of several prestigious medical societies around the globe.
